

14" Analog Clock

DC-14S, DC-9S

DC-DigitalTM
by IES Ltd.

Features

- Only two wires required
- Economical
- Extremely low power
- 1-year warranty
- No-Batteries
- Low voltage operation
- 24 VDC
- Surface mount
- Visible up to 100Ft.

Options

- Double face hall mount
- DC-9S 9" Analog
- Different face designs available

Specifications

- **Display** 12" Dial with red second hand
- **Case** 14" ABS
- **Weight** 1.5 pounds
- **Power Source** 24VDC at 3mA
- **Operating Temp.** 0° to 49° Celsius (32° to 120° Fahrenheit)
- **Case Finish** Black
- **Cabling** Two wires

DC-Digital Clock Description

The DC-14S and DC-9S, operate and stay accurate using 2 wires attached to a computer controlled clock module (CLK-S). Each clock is being corrected every second to maintain accurate time keeping. Daylight savings time and power failure is automatically maintained by the computer controlled clock module (CLK-S).

*The DC-14S and DC-9S require EZ-time software, CLK-S, and PS-15DC for correct operation.
